

How do I know if long-term acute care is right for me?

If you have a medically complex need that requires intensive, long-term care, consider our long-term acute care facility services. You can trust that a comprehensive treatment plan will be designed specifically for your needs.

Our facility offers patients a safe, seamless transition from physician offices, the emergency department, skilled nursing facilities and/or home health directly to our long-term acute care hospital. Our streamlined direct admission process helps ensure continuity of care.

Our caring medical professionals are committed and passionate about delivering high-quality care to every patient, every time. Our proven clinical results reflect that commitment.

We provide the following types of patient care:

- Daily physician intervention
- 24-hour nursing care
- Complex respiratory services
 - Ventilator weaning
 - Pulmonary hygiene
 - Tracheotomy
 - Chest physiotherapy
- Physical, occupational, and speech/language therapies
- Nutrition and dietary management
- Case management and social services
- Laboratory, radiology, and pharmacy
- Telemetry/cardiac monitoring
- Specialized IV team
- Pain management
- Antibiotic therapy
- Discharge planning
- Patient and family education
