

## How do I talk to my patient about home and community based services?

When it's time for rest and comfort, there truly is no place like home.

This is especially true when managing the challenges of a chronic disease or recovering from an illness or injury. Home and community based services help patients maintain their independence in the comfort and privacy of home. Our program offers professional skilled nursing services.

Skilled nursing is provided by an LPN/LVN or RN. They work one-on-one with patients who require temporary or long-term skilled medical care.

Care can be provided 24 hours a day, seven days a week, 365 days a year. We work with patients and families to tailor caregiver schedules specifically to your needs.

Services include:

- Wound care
- Enteral and parenteral feedings
- Medication management
- Nutrition counseling
- Medication injections
- IV therapy
- Catheter care and changes
- Oxygen use and safety
- Use of air compressor, hand-held nebulizer and MDI

Contact your local provider today for more information.
